- **Weight:** 8,5kg / 18.7 lbs  
\*(without internal drive)

*New!*

### The future of listening and the heritage of Electrocompaniet.

The new ECM 1 is a streamer and player, complete with the dac-section from our acclaimed ECD 2. It plays lossless, DSD and high-resolution digital content in a way that really makes you want to dig deeper into all the delightful music out there, as well as your own collection. It lets you enjoy music like never before. The streamer is very powerful, flexible and easy to use. It plays directly from Tidal, Spotify and Qobuz and can be fed through AirPlay or DLNA.

And of course it can even index and play from your own network-stored music collection. The powerful hardware supports all popular formats including DSD, and continuous software upgrades let you enjoy the latest streaming devices at any given time.

The ECM 1 shares its DNA with the new EC Living line. You can use the same app and interface, playing all your music on all of the units. You don't have to choose between high-end and multi-room, or flexibility and audio quality. It is all there. It wouldn't be Electrocompaniet if it wasn't. All the units are equally flexible, and work beautifully together.

Experience the intuitive ease and convenience of digital. ECM 1 puts all the music in the world at your fingertips. It lets you discover what is out there, and rediscover your own collection.

The world is full of music, and enjoying it is what it is all about. There is no better or easier way than through the ECM 1.
