

TANA SL-1

The TANA SL-1 speaker is an all-in-one solution, combining a wireless active loudspeaker and audio streamer. It can play music from your collection, or the internet.

Control is easy, either via the free app or a web browser. On it's own, it's a perfect companion to bring music to the bedroom, kitchen, the home office, and more!

Combine it with the add-on active loudspeaker, TANA L-1, to create a HiFi stereo system. You'll be amazed by the big sound of this small system.
