- Weight: 8,3kg / 18 lbs (without internal drive)

THE FUTURE OF LISTENING AND THE HERITAGE OF ELECTROCOMPANIET.

The new ECM 1 MKII is a music streamer and player. With the brand new, in-house developed streaming software and app, it plays lossless, DSD and high-resolution digital content in a way that really makes you want to dig deeper into all the delightful music out there.

The streamer is very powerful, flexible and easy to use. It plays directly from Tidal, Spotify and Qobuz and can be fed through AirPlay, DLNA or Bluetooth. The ECM 1 MKII has updated technical and sonic enhancements, as well as new mechanics and design line with the new MKII versions of our products. And of course, it can even index and play from your own network-stored music collection. The powerful hardware supports all popular formats, and continuous software upgrades let you enjoy the latest streaming services at any given time. It also supports plug and play installation of a 2,5 or 3,5" SATA hard drive of unlimited capacity to host your music collection.

The ECM 1 MKII uses the same app and interface as our EC Living line, enabling you to play all your music on all of the units.
You don´t have to choose between high-end and multi-room, or flexibility and audio quality. It is all there.

The world is full of music, and enjoying it is what it is all about.
There is no better or easier way than through the ECM 1 MKII.
