

ELECTROCOMPANIET

If music *really* matters™

BALANCED INTEGRATED
AMPLIFIER
WITH NEXT-GEN STREAMER

ECI 6DX MKII

The new ECI 6 DX MKII combines a best-in-class feature set with cutting edge audio technology and true Electrocompaniet sound.

This single unit is able to play whichever, wherever and whatever audio source you may have, and makes it sound like music was meant to be.

Like its predecessor, it has an extremely powerful built-in streamer, flexible and easy to use. It can play directly from music services such as Tidal, Qobuz and Spotify, can be fed music through AirPlay or DLNA, and it can even index and play from your own music collection stored on your network.

The powerful hardware ensures that all popular formats are supported (including DSD) and that continuous software upgrades can support the latest and greatest streaming services.

The ECI 6 DX MKII also features the design upgrades introduced with the MKII series, including new front plate design and updated, more rigid chassis.

The ECI 6 DX MKII can be operated by the intuitive iOS & Android application, the universal webinterface, or with the straightforward IR remote control.

TECHNICAL SPECIFICATIONS

Amplifier section

- Output power:
 - into 8 Ohm: 2x125W
 - into 4 Ohm: 2x200W
 - into 2 Ohm: 2x370W
